V. EDUCATION

A MJS School of Nursing quarterly in person and site visit report/ response (Annette Murray MSN, RN)

Annette Murray, program director & Dean of Academics and Oranu Ibekie, campus president appeared on behalf of MJS College. Ms. Herron, Education Compliance Officer, presented her site visit report. Ms. Herron stated that the program has received ACICS accreditation since the previous visit, and most recently approval to qualify to offer financial aid. The program serves a unique niche population. About 75% of the students are currently LPNs. MJS was the only program willing to evaluate students for possible admission in transfer as a result of the closure of Indiana Dabney. With 5 other schools of nursing in the area, Ms. Herron stated that there is intense competition in the area for clinical sites. Ms. Murray was asked about OB clinical hours and she stated that students have experience with pre natal and postpartum care but do not have active experiences with peri-natal patients. Simulation is used to demonstrate the birthing process with use of videos to supplement. Med-surg experiences are primarily in an LTAC (long term acute care facility) but involve ventilator, tracheostomy and complex wound care experiences. Ms. Murray stated that they are in negotiations with an acute care hospital in the area and expect to have a signed affiliation agreement shortly. There are currently 30 students with 4 faculty, including Ms. Murray.

The last admission was October 2015. 75% of students are currently LPNs and Board member Cooper stated concern regarding whether these clinical experiences will prepare them for the next level of responsibility. Cost of the program is about \$30,000 or about \$400/ month out of pocket. Ms. Cooper stated this is a significant amount of money for a student and that students deserve a better return on investment than a 33% chance of passing NCLEX. Board member Cooper stated that scores have gone down the last 2 years so there is little faith in the Plan of Correction up to this point. Ms. Murray stated that change takes time and they are beginning to see results in students that are moving through the program after the changes have been made. Board member Morrison suggested exploring the idea of a merger with a larger program to be able to address the issues of competition due to size and Board member Owens suggested contacting the Black Nurses Association for recommendations or assistance in obtaining clinical site opportunities. Board member Hall moved to accept the site visitor's recommendations with one addition. Board member Cooper seconded.

Recommendations are:

1. Place on conditional accreditation immediately
2. Submit revised Plan of Correction no later than March 11, 2016
3. Continue monthly written reports to be presented in person monthly to the Board regarding progress
4. Continue to add clinical sites – especially acute care
5. Halt admissions effective immediately

Motion passed 7-0-0.

Board member Hall advised that scores for 2016 Quarter 1 & 2 would be reviewed in September and if they were not at or above 80%, the fate of the program would be in question.

B. Brown Mackie South Bend Systematic Plan of Evaluation, January monthly written and February quarterly in person report (Ellen Noll MSN/Ed., RN)

Board member Hall recused herself due to a conflict of interest as she is employed by Brown Mackie College. Ellen Noll program director, Wayne Korpics, regional campus president, Darla Silverman academic dean and Brenda McAllister, regional nursing director appeared on behalf of Brown Mackie South Bend. The Systematic Plan of Evaluation, January and February 2016 monthly reports were reviewed. Ms. Noll states that there have been no testers to date. Board member Cooper moves to accept the reports as submitted. Board member Russell seconds. Motion carries 6-0-0.

C. V.R. Ashwood quarterly in person report (Dr. Nellie Smith EdD, MSN.)

Dr. Nellie Smith appeared on behalf of V.R. Ashwood. Board member Cooper clarified the timeline of admissions. The program received board approval in 2011 but did not admit the first cohort until 2013. There were 9 graduates in December 2015 that are in NCLEX preparation now and are expected to test in March. The school is using Virtual ATI which will give the green light predictor. When asked, Dr. Smith stated that there are 60+ students waiting for admission to the program. Dr. Smith stated that everything is in place, including adequate faculty, to accommodate immediate admission of another cohort. Board member Cooper moved to make the following recommendation:

1. Allow admission of cohort not to exceed 10 in number in 2016.
2. Submit monthly written, and quarterly in person progress reports, to the Board no later than the 5th of each month. Board member Russell seconds. Motion carries. 7-0-0.

D. Fortis School of Nursing quarterly in person report (Laura Darnell MSN, RN, Dr. James Cox)

Laura Darnell - ADON, Cinnamon Bell-Williams – program director, Dr. James Cox – campus president and Terri Harville – regional nursing dean, appeared on behalf of the program. 2015 annual NCLEX scores for Fortis College are 58.3% (7/12). Board member Cooper asked for the number of students at Fortis currently and Dr. Cox stated 162 on campus – 81 in general education and 70 in nursing classes. Dr. Cox was asked about the cost of the program and stated that it is \$44,000, which Board member Cooper stated was a hefty cost which resulted in a 60/40 chance of successful completion of NCLEX. Dr. Cox stated that there have only been 41 graduates from the nursing program thus far. HESI entrance testing is used in conjunction with Wonderlic scores for admission. Only English and math scores are used. Board member Coto suggested adding in the science score as well, since studies have shown a direct correlation between science predictor scores and successful

completion of a nursing program. Board member Cooper stated that there are up to 4 attempts allowed to complete the Wonderlic general admission test which is concerning. Board member Cooper asked about faculty numbers and was told there are 3 full time and 2 part time faculty. The most senior member has been with Fortis for 3 years. Dr. Cox said finding qualified faculty is their biggest problem. Dr. Cox stated that their goal is 5 full time and 4 part time faculty with the program director being 100% administrative without a teaching load. There is an interview for another faculty member set for the near future. Board member Cooper asked about nursing involvement in the admission decision since none was cited in the most recent Plan of Correction. Nursing involvement is missing. Ms. Bell Williams was asked about her background. Her MSN is in education and she has been part of academia for the past 7 years. She is completing her terminal degree at Lewis University. Her previous employer was PCCTI in Illinois and Truman City College. Board member Cooper stated that the Board has concern with communication with students and that they are being misled through the admission process. The next scheduled admission is April 4 with 18 applicants thus far. Ms. Bell Williams stated that she has had 2 town hall meetings with students and plans on having more. Board member Hall moves to recommend:

1. Return in March to present a new Plan of Correction developed by the new dean in collaboration with faculty.
2. Based on the Plan of Correction submitted, the Board will decide about accreditation status and the ability to admit new students in March.
3. Supply copies of curriculum vitae for all faculty to ISBN for review.

The ASN program has had NCLEX scores below 80% for 3 years. There is one open faculty position at the present time. Due to Magnet status, and the proliferation of other nursing programs in the Ft. Wayne area, there is intense competition so there is no acute care clinical site in use. Board member Owens stated the lack of regional accreditation is more of a barrier to access of acute care sites than the Magnet requirement. Board member Cooper moves and Board member Owens seconds to:

1. Submit Plan of Correction to Board no later than March 11, 2016
2. Appear before the Board at the March 17th, 2016 meeting to discuss the Plan of Correction

The respiratory situation was not uncommon for him. He was in the same position the week before. The father had called the physician. The mother was on the phone, they didn't want to send the child to the er. There were some improvements after he had started treatments, he didn't see any reason to call supervisor at the moment because he was still working with the patient. He noticed he was in distress, he had the dad to call 911, he had started compressions and the ambulance got there. He was only there for about an hour and a half. The physician ordered the boy to go to the er, the parents didn't want him to and he thought he was getting better so he didn't go to the er. He did not call the doctor back to say why that ordered wasn't going to be followed because he was busy taking care of the patient. He has completed some CEUs. He is currently employed with no issues. He has been a nurse since 2007.
